Node.js Backend For Educational Course Management System

Project Overview

This project aims to develop a backend system using Node.js that effectively manages educational courses. It will facilitate student&course creation, student enrollments and assignment submissions, all through a RESTful API interfacing with a SQLite database.

Used Technologies

- Node.js
- Express.js
- SQLite
- Npm (Node package manager)
- Sqlite3
- Nodemon
- Fs

Challenges and Solutions

1. Straggaling with sqlite database and node.js connectivity
